

NIHR ARC EoE PCIEP Strategy at a Glance

Extend Research into PCIEP

01

Extend PCIEP of Diverse Groups

02

Extend PCIEP of Under-Represented
Communities

03

Use UK National Standards of Public Involvement

01. Inclusive Opportunities:

- Adopt a 'community-led' approach whereby we support communities to define what is important to them
- Invest in training addressing issues related to community engagement, widening participation, diversity and inclusion

02. Working Together:

- Foster close working relationships between public members and researchers via the PCIEP Coordinating Group
- Work with people in ways that suit them rather than expecting them to come to us

03. Supporting and Learning:

- Develop and deliver PCIEP training for researchers
- Support digital learning and acknowledge digital exclusion

04. Communication:

- Explore communication channels and tailor these to suit individual needs
- Disseminate ARC EoE PCIEP activity via regional and national platforms

05. Impact:

- Evaluate the effectiveness and impact of PCIEP across ARC EoE
- Engage PCIEP members in our reviews of success

06. Governance:

- Involve PCIEP representatives in our steering groups, executive meetings and PCIEP strategy
- Hold 'community engagement events' whereby members from those communities participate and inform our research
